REFERENCES ON REQUEST

PROFILE

A passionate and inquisitive Front End Web Developer with circa 5 years' experience in freelancing, full time employment and self-learning - demonstrating a strong commitment to continuous growth and professional development since a career change from client-facing roles in 2020.

I'm currently a Front-End Developer at Juniper Education, an Ed-Tech provider, where I quickly established myself within the department whilst also freelancing at weekends and evenings to keep up to date with the latest technologies and help progress my career.

A recent freelance project includes a feature-rich construction website built using **Next.js**, **Typescript**, **Tailwind** and **Sanity.io CMS** - see [Rosco & Perlini](#).

And also build my own app to better understand backend development to be a well-rounded developer.

I genuinely enjoy all parts of Web Development and want to keep challenging myself in the field.

CURRENT POSITIONS

Senior Front End Developer

Juniper Education Sept '23 - Present

[Ed-Tech agency for the education sector, including web design and development services](#)

- HTML, **SCSS**, **JavaScript** & **ASP.NET** (surface level) focused role, building multiple school, multi-school trust, federation, and teaching centre websites
- Consistently meeting project timescales and exceeding client and project management expectations
- **Leading team efficiencies** with boilerplate improvements, snippets & templates
- **Pixel-perfect** websites built from professional designs on Adobe XD
- Working from challenging and diverse designs, using initiative for transitions, animations, and mobile layouts
- Reactive to 'Odd Jobs' (tickets) to fix and add features to existing clients' websites, working with both modern and legacy codebases
- Supporting Junior devs on technical aspects
- Ticket quoting for the time required for fixes and new features being added to existing websites
- Ensuring all websites are **WCAG compliant** - now a legal requirement for school/government websites in the UK

React / Next JS Freelancer

Freelancing & Continued Learning 2018 - Present

- Managing freelance work in evenings and weekends to gain as much experience possible, currently focusing on **Typescript**, **Next.js**, **CSS**, **Tailwind** and **Sanity.io (CMS)**, all designed and prototyped on **Figma**.
- Recently built a feature-rich construction business' website using Next.js, Typescript, Sanity.io (CMS), Tailwind and CSS, using **GitHub** for version control
 - <https://perlini.co.uk/>
 - **Pixel-perfect** website developed from a professional design on Figma with fast and fluid user experience
 - Reusable components used throughout to keep code maintainable
 - Configured for **preview editing**, allowing client to review changes before publishing them
- Built an e-commerce store using **Next.js** & **Typescript** with **Medusa.js** (Headless, open-source ecommerce platform)
 - <https://lce-front.vercel.app/> *NB. awaiting instruction to launch
 - Headless ecommerce, working with and adapting existing code in **Typescript** and **Next.js** for a custom setup as per client requirements
 - Built **custom email templates** for customer transaction (order confirmations, account sign up etc)
 - Frontend hosed on **Vercel**, backend hosted on **Digital Ocean**
- Recently built my own shopping/recipe app with **AI integration** using **Express.js**, **PostgreSQL** - [see my MVP here](#)

HOBBIES & INTERESTS

- DIY, home renovations & gardening - recently refurbished our victorian cottage
- Golf, running, general fitness and cooking
